

## The 5<sup>th</sup> Nature and Ecology Conservation Project by TOSTEM THAI

19 August 2017

TOSTEM THAI's managers and employees from different departments travelled to Khao Sam Lan National Park, Saraburi Province on 19 August 2017 to participate in "Nature and Ecology Conservation Project by TOSTEM THAI", which was now held for the 5th time.

On this occasion, participants took part in reforestation activities. Despite an extreme heat during the day, the participants took part in the activity with big smile and managed to reach the goal of planting 1,000 trees, as well as constructing three dams.

This event presents another effort by Tostem Thai on environmental conservation to create a sustainable business practice for a greener and a better future for the society.
